New High Performance Bearing Nuts

Double your grip force without increasing your locking pressure.

Add (2) HP Bearing Nut for \$100 More

ER32 standard nut locked at 100 ft/lbs using a 1/2" carbide test arbor, the arbor slips at 60 ft/lbs of radial torque, using a Pioneer Bearing Nut the arbor slipped at 130 ft/lbs of radial torque.

The average improvement on ER16 thru ER40 was 75% to 125% increase in radial holding power.
